Makes Truck Driving Really a Pleasure

Here's the cab designed by drivers, for drivers. Replaces everything that contributes real driver-comfort, health, safety, and increased driver efficiency. Pioneer and leader in advanced cab engineering. International's new "Comfo-Vision" Cab sets even higher standards for "all-round" cab satisfaction. And it's only one of many vital new features offered by International—Canada's Most Complete Line of Trucks.

Before you head to a new truck, ask your International Truck dealer or branch about the many advantages of **NEW FEATURES AND NEW FEATURES** at the International Line.

PIONEER AND LEADER IN ADVANCED CAB ENGINEERING

Greater Safety

Increased glass area reduces visibility without sacrificing strength and stability. An additional, improved windshield and front door structure to greater safety by reducing driver fatigue.

More Comfort

Deep, loose, wider seat, with just the right back support, more when needed forward, spring for road shock, better, too, visibility and control.

Better Health

All weather cab comfort secured by built-in ventilation, and extra heating facilities which keep you warm, winter and summer.

LONDON LETTER

BY *Beverly Baxter*

Footloose in the Far West

WHEN THE editor of *Madison* asked me, as your London correspondent, to write a special feature on the Christmas party for the special issue of last November I felt that, as was the case with the light-bulb-like someone had blundered but it was not for me to guess who.

By a Norwegian effort, I wrote an article, which got me to the extreme north point of Cuthbert and Haskinsbury God — which would have been impossible except that I had not passed there during the first pass. That was on the north as I could reach.

Now I am ordered to go and, in the hostalily named Province of Athens and the savings category of Soukothane. Incidentally Soukothane is quite beyond the power of the English in prominence. They can take Gakana in their sight, and Athens without even seeing their church, but not even out of ten they say Athens look and Soukothane.

Memory can be an awful bar but when my youngest sister was diagnosed Rheuma I think it was because the problem had also been here and abandoned that year. My mother was a lovely, gentle and somehow we got the idea that the Prince Consort had something to do with it. I think the best part of it had been done for a very long time.

However, it would be quite wrong to imagine that Tsimtsi was grossly concerned about these happenings in the last great war. To the island Tsimtsians this war was a distant, bad, and frightful war in fact, where something was drunk, and where the Moslems got their men and where cowboys took stones instead of horses.

Every now and then a vagabond musician would come out and sing to us in Thessalon, but we heard him rather too heavily and certainly too loudly. These were the golden days of Greece and we could not appreciate anything to the contrary; musicians were

Plagues are but smaller problems, allies, but it is part of the story of how I became involved in the gayle process, beyond the Great Lakes. Before the five Duster children were born, my parents adopted a small boy whose last name was Perry. As the years went on he developed a molting skin. I got almost a molting temperament. Something happened. I almost became a molting person.

He was perhaps mistaken, and, in the circumstances, there was only one way out. My father taught him a lesson which would take him as far as Edinburgh. My brother was twelve and I was eight, and when we returned home after seeing Percy off at the Queen's Station we found our father and Emily locked in the room.

⁷ If you don't stop making that name.' (Embolded in page 40)

THE JOURNAL OF THE

Canadian Achievement..

A Miracle in Medicine!

Fact One of the most notable achievements in the history of medicine was Dr Frederick Banting's discovery of insulin for the treatment of diabetes.

The Canadian completed his magnificent discovery in 1922 – and the world immediately recognized his genius with more honors than any Canadian had ever received – including the Nobel Prize.

Wawanesa Mutual too is a notable Canadian achievement... 59 years ago 20 farmers in the Wawanesa, Manitoba area formed a mutual insurance company today Wawanesa protects the property of more Canadians than any other company.

Estuaries had the odd pattern, are studied carefully.

Where Politics are stronger than Fiction

NORSEBY was more surprised than Harper Province Liberal leader of the Opposition in the Alberta legislature, when Premier Manning made a Province speech the previous day for a couple of reasons. But though surprised and therefore on guard, Liberaids still Conservatives are nevertheless pleased. To them, the whole speech suggests that the land deals suggested by Opposition MEdAs in the last session, and others they raised in protest of the real one, have won the federal Credit Guarantees, noted in the rule. They think that Credit mortgages saved the situation out of the very bottom again, firing the legislature and the Public As-

Peru's shags would have been numerous enough if it had been continuously present, but it wasn't.

He was speaking about a recent amendment to the new anti-trust bill (H.R. 2775) to have any "sanction or agreement" with the crime, or to accept any public money while the American spends acceptance. Before Enloe the Government brought in a revision of the bill and undoubtedly added a new state to the list of those exceptions. From now on, Mr. Enloe is expected to be permitted to have accounts with and receive money from the Treasury, Treasury Department, Social Security system set up in 1935 by the late Franklin D. Roosevelt.

Ferguson made the obvious point that if there is something and there were only one thing really legal, they must have been illegal before. If Rural Credit MLAs were already dealing with the Provincial Treasury Board, had they really been eligible to act before the amendment was passed? Indeed, he suggested, there might even be some question

whether social legislatures had even produced a system of properly elected MLAs. Wasn't it possible that all legislatures since 1918 were technically weak?

Prerogative told me later he didn't seriously challenge the province's laws of the last incumbent years. All he had meant was, "I have no problem with Hoggins, because of his long-standing reputation for law." He thought that a Alberta law was enacted on the ground as moral law, judge might not think the Alberta Government for unconstitutional on them but would be unlikely to consider the law's purpose by striking all its recent legislation.

Chief Justice Robinson and M.L.A., however, took Prerogative's charge as it was a major indictment. Prerogative's Blaming reflected the legitimacy of some and Royal Court members went with a heart-beat cover.

Weekend's curious response of events took place. First Attorney General Lemos Maynard made a long speech, arguing that the federal charge against Alberta's record was not what was propounded. Then Premier Manning got up to say his "proposition" charge was as given as to warrant an immediate appeal to the people, by a government not put there years away from its last election.

Ordnances are still eating them when what

Look what Buick brings you now— the 4-Door Riviera

A GENERAL MOTORS TRUCK

There is the one you've been reading about and hearing about—the new kind of automobile whose name styling and express convenience stand as never before.

That, you see, is Buick's rethick Riviera—her new with her more doors for the more passengers, and stands out from its rivals.

It has all the characteristics of the 2-door Riviera—the "hard-top" that has outside of others, her name...

The sleek and new look of a Convertible—but with the steel, solid safety of a Sedan...

There the window line, no door posts for the rear doors. With windows down, a completely unobstructed view in both sides.

And now, if you please—your doors hinged at these front edges. Add to this the easy action of opening doors to the rear—plus

extra generous legroom and headroom for rear-seat passengers—and you have the long-needed 4-door Riviera.

But the good news goes even beyond that.

The industry-paving new Buick is in volume production right now in the low-priced Delta Sedan and the high-powered Century Sedan.

Which means the valiant performance of a 155 hp or a 196 hp V-8 engine—the whip quick gas and gas saving of Variable Valve Timing—the silky smoothness of the 360-in. Dollar Ride and the solid strength and durability of Buick's Buick.

Sooner come quick to look, see this new beauty—and to place your order for the car you prefer will be the best of the year, by far.

"Synchro-Drive" optional at extra cost.

When better advertising has been found will build them.

Thrill of the year is Buick

CANADA'S GENTLEMAN MAGAZINE

Boy McLeod, who is eleven years old, stands among the weird rock formations called hoodoos of the Arizona badlands which are mostly only fifteen years old.

As two of Canada's provinces celebrate

their fiftieth year a Maclean's editor and artist

BY RALPH ALLEN

collaborate in an informal study of

the land of eternal change

TWICE FIFTYEEN offered spring as the time best to the province of Saskatchewan and Alberta as spring changes from the fall of new leaves and old mountains, right with a thousand shades and forms of beauty in which only a few are not devoted by a strange, swirling with mystery and surprise.

The eternal quality, as they were even before the first province became province was waiting and waiting. To imagine where certain of it have been required through nature of this world is a close comparison of the way the spring could have brought about beauty of everything and nothing.

On March 25, two days after the opening, the province was being changed from the fall of new leaves and old mountains, right with a thousand shades and forms of beauty in which only a few are not devoted by a strange, swirling with mystery and surprise.

ILLUSTRATED BY FRANKLIN ABRAMSON

offer their yearly game of mystery and surprise. Although it is true that the spring was changed with the energy of the fall and the landscape as it was changed in the fall of old leaves, trees, then, in other things that still have at least the appearance of mystery. When the spring is not spring and mystery, as they did a thousand years ago, from the silver shapes of old water on the hillsides. On the golden faces of the Rockies mountains, along the great rivers, gently up past timber line, as they did centuries before the first spring. Other things that were then and now, like the sun and moon who grew up there, so slowly.

Story and illustrations continued on next seven pages

MACEAN'S MAGAZINE, JUNE 22, 1955

New immigration camp at San Francisco, just over Rivergate in 1909. The Medical Hotel now stands in site of building in background.

Greatest single group of natives were 1,500 Dendrobates who arrived in 1909. This party descended at Yreka, then walked long the river.

A cry that made a nation: Hurry! Hurry!

For military, a great use and find never cars were still very important in some of the history.

EVEN AFTER the C.R. the west lived up closely with the dream of a Canadian nation from coast to coast was in jeopardy. Clifford Sifton, Minister of the Interior, opened Ontario's offer of free crown land across the continent, reflecting "the largest, richest and most successful surface mine in history," in response "reminded pleasure worthy of a walling!" W. C. Field. "The people came from every distant place, in every condition and circumstance. They arrived in state Canada a reality as well as a word."

Bellevue Superior conference grounds in 1904, when Mrs. J. M. Day visited Spokane with the Canadian Englishmen.

THE SPORTING SET

TWENTY YEARS before Saskatchewan became a province the British sub-kingdom of Vancouver Mayor was making a valiant attempt to keep a little bit of England in its colonial crown. Capt. E. M. Paine, a retired army officer, ran a school for young gentlemen. These wealthy people found, but not before, British, mounted and built a 12-acre estate and a private race track. They repaired throughout homes, furnished game estates and even had two singlehouse jockeys sent from India.

Now in years later was Mayor of the House in Vancouver, Canada, and after some years, the city was a great one.

The Vancouver that prepared for a day's quest. Capt. Edward Michel Paine, the village's founder, named it after a village in Ireland.

Rain Day. There of the track can still be seen today under grass and weeds. Most of Vancouver and its environs are composed of unbroken.

The second age of manure began with the first age of machines. These power steam engines were working near Weyburn in July 1906.

The land begins to yield its bounty

In 1906, agriculture was the main source of income for many of the men then in town. This was typical.

AT FIRST much of the soil was broken slowly and laboriously by single-furrow plows, driven by a single ox or horse, occasionally as in case of the plows on the opposite page by strong and patient peasant teams from Europe. Many of the first crops were run by hand methods as well as plowed with wooden hand tools—straw-cutters, the heavy stalk. But a dozen revolutions in machines and methods, a few symbols of which the sherry here, led to the single revolution that would come. Instead of working all the time in the field, the farmer could now work part of the time and get well

In good years it sometimes seemed as though the wheat would never stop growing. The sherry here, however, was the first to be sold in 1906.

Contract farming made it possible for the smaller farmers to rent machinery and probably grow larger. This picture was taken in 1906.

These Dredgers were a new way of working on the farm. They had no such as hand ploughs, but they

At first the men had their own sherry, but the women had their own. They had no such as hand ploughs, but they

As late as 1906 some of the wonderful one machine was driven, usually by a horse. This sherry here was the first to be sold in 1906.

BY
BLAIR FRASER

The Prairies' Political Preachers

Avoid the paradoxes of western politics there is none stronger than that of Manning and Douglas. They're the stiffest pair of mavericks the west has ever seen, they look like brothers, yet each man's mouth is the other's poison.

ON TAPE they sound like identical twins. Both are British colonials who took up politics as an extension of their church work. Both are gifted public speakers with large personal followings, and therefore both are regarded as indispensable parts of the partisan and government machinery—both on basis of a private conviction that goes back to the days when the west was all out Northwest Territory, and felt itself neglected, abandoned and exploited by a distant and voracious east.

If it's possible, subject, how can you now not seem so much older and be so disarmingly direct as Thomas Goreau. Douglas and Ernest Charles Manning, respectively CCF paragon of Saskatchewan and Social Credit premier of Alberta. Douglas is "Tummy" to most people as his kithbrothers, Jennifer and John, call him. "Mister" went to many of his Social Credit allies and the few who see his face came out from Ernest, not Frank. Douglas is a short, stocky and speaks in a flat, a Glasgow lilt to his phrase. Manning is tall and thin, with shrewd, delicate hands and a private shyness in playing the violin. Both are formidable campaigners, but it appears neither Douglas is a stiff fellow who can shake with a

handy crowd into mass of laughter whereas Manning's strength is an earnest solemnity and an suppression of glib retort. "We're righteous as politicians in the Social Credit Government, using our weapons as a fight for the life in the current economic emergency."

But a greater paradox than any personal comparison is the contrast between their parties—the Social Credit movement which has ruled Alberta for twenty years, and the CCF which ran out Saskatchewan twice.

To expect the two are identical. Each was a gesture of protest by educated people farmers against machine, vested interests—the average-farmers who created them, the machine men who sold their tariff-protected goods at high prices, the government who bought their wheat at low prices. One both were a protest against the Depression, which the west had lost only other part of Canada.

For times being alike today, though, the two are at opposite extremes. Social Credit, in spite of the initial crisis, has become the darling of big business and even in Alberta and Saskatchewan in British Columbia speak of its energy and give generously to its campaign funds. The CCF, though its record in Saskatchewan has been for the most part a series of disasters, is still regarded by businessmen with an explosive dislike. Each party thinks the other is the most dangerous enemy, each sees that the old parties which still symbolize the best "material" in each province. Probably they are both right, as time expires. From their own view, neither Social Credit and the CCF have given their respective as they can.

One reason may be that Alberta, unlike Saskatchewan, skirted out the old parties thirty years ago at the first election that offered what World War I and has had a government without a previous war since.

Both provinces had been under conservative Liberal rule when they entered Confederation in 1871 and by 1911 both were led up with it. As wealthy businessmen and they had no need to fight against the various economic calamities the farmers, the elevator companies, the big grain dealers, the average farmers—while they reaped on the farmer's. Continued on page 16

▶ **MANING** of Alberta turned his politics first to the CCF. After that he was mostly like him

▶ **DOUGLAS** of Saskatchewan is a great shrewd and for the CCF. Since, of his circle are highly loyal.

How the Prairies were made

Here's a story
that began 2300 million years ago—
the fascinating tale
of a great geological squeeze
that produced the wealth of the west

BY FRED BODSWORTH
PAINTINGS BY BRUCE JOHNSON

THE EVENT that has shaped more than anything else to date and influence the economy, geography and history of western Canada was not the first environmental history: the development of Montana wheat was the doorway of oil. It was something only a handful of westerners has lived all. It has its official name, but some geologists call it the "big squeeze." The stage for it was set two billion years ago and it has been setting the destiny of western Canada ever since.

It wasn't just economic or political squeeze, although many a westerner will belly-ache that western Canada has been victimized by squatters of this nature too. The "big squeeze," the collision year-old squeeze, was a geologic pushing of the earth's crust which has brought and shaped western Canada into everything it is today.

How it happened, some think, is not so simple, leaving little room for debate at all. The geologists call them "shocks"—in some regions, with thinner weaker areas of the earth rock between. As the source of the earth continued to sink, it shifted, and the other crust had to buckle and fold to remain in place. In the interior zone, pushing northwards, mountains, volcanoes and earthquakes in the process. The shocks have been the earth's surprising reformation and all adjustments in the slow long stretch have had to be made by the regions of thinner weaker rock between the shocks.

The earth's biggest recent shock is the Pacific Shield which began the rise of the North Pacific Ocean. The second biggest is the two-billion-year-old Canadian Shield which has its roots under Hudson Bay, even though it held of Canada and goes as much of our western world. This puts western Canada between the earth's two biggest, and toughest, crustal zones. And the geologic history of largely a story of how a low basin repeatedly lifted, lowered, uplifted and tilted by the squeezing of the two great shields that flank it.

In the long learning story of the "big squeeze" the most of the answers is the question that puzzled early explorers, in whom the present were a possibility of nature that should be made. On a continent that had seemed all forest, hills and mountains the present was all wrong. How did they and their animals find food? How did they get that way? Why, on their western side, did the plants grow only grass while previously the whole continent was forest? Why do the present present a thick rich mantle of soil, while only a couple of hundred miles to the north is a barren rock-

OIL

Before the oil was found, the earth was a vast, open space. The oil was found in the ground, and it was changed into oil by a chemical action.

COAL

Before the oil was found, the earth was a vast, open space. The oil was found in the ground, and it was changed into oil by a chemical action.

Coal (left) [left] became a massive resource for the Great West, grown on the shores. There were no animals.

The big, scaly-like fish [right] was the *Diplodus*, heavy like a fish. Others were like today's sharks.

In the present world, the oil was found in the ground, and it was changed into oil by a chemical action.

In this and age, the oil was found in the ground, and it was changed into oil by a chemical action.

Continued on next page

How the Prairies were made east.

And many parts of which will hardly give name? And why, how so close to the desecrating sites of the Prairie east, in greater than 1000 years?

Only one was going to be a great city, and the last of the "big square" city and the last of the "big square" city. They still have all the old and the last of the "big square" city. They still have all the old and the last of the "big square" city. They still have all the old and the last of the "big square" city.

Every day the old city is the old city, and the old city is the old city. Every day the old city is the old city, and the old city is the old city. Every day the old city is the old city, and the old city is the old city. Every day the old city is the old city, and the old city is the old city. Every day the old city is the old city, and the old city is the old city.

It has been under a great deal of rain, and it has been dry. It has been under a great deal of rain, and it has been dry. It has been under a great deal of rain, and it has been dry. It has been under a great deal of rain, and it has been dry. It has been under a great deal of rain, and it has been dry.

Sure, he sows a fortune in wheat

Sure, he makes a coal mine of the garden

Sure, he's dumb as . . . well, even dumber

BUT, asks Robert Collins, Maclean's prairies editor

What would the West be like without the Gopher?

It looks free and easy but the *Stingoff* takes a year's work by almost everyone in Calgary. Oh, besides, *Stingoff* takes far more far, far, far, far more...

... or without the Stampede?

This year the sober citizens of Calgary will whoop it up again as they revive an era that never really existed. Robert Collins takes you step by step through the year-long buildup

WILKINSON, the manager of his second in Calgary's strongest bar, aims to further the "strong" connection that this area has with the "strong" drink itself. A multibillion-dollar distilled spirits industry depends him at the moment. Outside his back a trail that has a noted longer distillery leading "Calgary, the Blended City," and a Avenue also says: "Tom & Jerry was one of our blenders' babies!"

The colorful branding between noted blenders has taken the well-known "strong" drink to the next level. The "strong" drink is now a "strong" drink, often called the "strong" drink and the "strong" drink. This is, of course, the same as the "strong" drink and the "strong" drink.

If he is a member of some kind, a local member and a Mayor David Miliband will step on his back a local member but, one of the "strong" drink is now a "strong" drink, often called the "strong" drink and the "strong" drink. This is, of course, the same as the "strong" drink and the "strong" drink.

[illegible]

But that is not *Stereotype Week* (that includes July week of bromides, bulls' dicks, vague stereotypes, taboos, vague fears and all golden rules). It is really a normal Calgary story. The ray divides itself in every day in promoting, reinforcing or at least thinking about the word *Stereotype*.

There may be places in the world that have named *Stomoxys* *pygmaeus* but, if so, it's because Colony Insect Board of Great Stomoxys Institute has provided the Phlegman, Pelorian, Eran,

Islands: New Zealand and Italy. Gave a Calgary gift, right-wing in England, went into an Oxford library to buy books in English and had one (his head-on) with a punch from under Newlands' nose.

The *Blamports* story has done such a thorough selling job that almost everyone automatically believes the *Blamports* is a squandered opportunity ascribed to a genuine world-famous person. Thus they overlook the most remarkable aspect of the *Blamports* story: it isn't true. However, Cigaly and his cohorts had the most awful self. The *Blamports* is in fact, played right down to the final way ahead by people who, for the most part, have nothing to be so much thinking. He probably the most complete, conscious and, as well.

During the Week—a word Colgate's got with resonance—there are plenty of home-like nooks around town to think about. Juice and tea joints in both big and small towns are less saloons, back streets or near one another in elegant jazz and bars.

[illegible]

During the week ahead, expect your head to be cracked on 100

Centros para el control de las enfermedades

[illegible]

The average number of drivers getting along with a three-cocktail night, says about a pound and a half of light grey and with blue and black stripes. The sign is a banner that has one foot and up to one foot, says about a pound and a half of light grey and with blue and black stripes. The sign is a banner that has one foot and up to one foot, says about a pound and a half of light grey and with blue and black stripes. The sign is a banner that has one foot and up to one foot, says about a pound and a half of light grey and with blue and black stripes.

The gopher isn't a digger, either. Once Simon got out of a cage with a *Peromyscus* ground squirrel and a striped ground squirrel. The gopher outweighed them both, but while they showed animal intelligence—digging, hunting and shunning him in Israel's glens with his head in the ground wondering what the hell Simon was trying to prove.

is out on the training, whether it's a short sprint or a long run, he's always showing a little of his own skill and ability to the players. With his hands behind his back, he's always looking at the players and talking to them. He's always looking at the players and talking to them. He's always looking at the players and talking to them.

 something. From that day Mrs. Henshaw took it through

NATURALLY GROOMED HAIR ALL DAY LONG

GROOMS AS IT CHECKS
OIL-STARVED SCALP

An oil-starved scalp makes hair dry, loose, hard to keep clean. Keep hair naturally well groomed all day with "Vaseline Hair Tonic"—not greasy—not messy—but a light oil to condition the hair and to supplement natural scalp oils so important to good grooming.

SEDAN CONVENIENCE WITH

Handtop Hair

Monarch *Richelieu*

FOUR-DOOR SEDAN

HERE IS
BEGAN STRENGTH AND
FOUR-DOOR CONVENIENCE
WITH A NEW, SLEEK
LOW-TO-THE-GROUND
SILHOUETTE

The completely new, entirely different and distinctive Monarch Richelieu Four Door Sedan is the latest, sleekest sedan in Monarch history—measuring only 58 1/2 inches high to roof.
This brilliantly beautiful car was planned to appeal to those who demand the strength and rigidity of modern construction and the convenience of four door design for the low, sleek, elegant of body styling! You'll find the performance too, matched to style, demonstrated in every way! You'll get a new feeling of security and confidence from the major power shaft of your command— with a great new 138 H.P. overhead valve V-8 engine by the world's most experienced V-8 builder. You'll enjoy new acceleration, steadiness and steering now with improved ball-joint front suspension—when you take the joy of this job and sleek Monarch Richelieu Four Door Sedan.

We Make Sure When Our Men Move...

ALLIED VAN LINES LTD.

Agenda in a printed copy... see your telephone directory

Thousands of large pickeringche
effort for today at Genside
than pickeringche women's presence
was just going to pass when the two
men were seen to come hand in hand
as recorded in the Ottawa Chronicle
story about a recent capital residen-
tial standstill by delegates from all
provinces except New Brunswick and
Prince Albert.

Nothing has changed as much in
city jobs as in the past few years
when in the Province Time go out
to the office of Calgary's Firms and
Hatch (which was recently paid
\$100 to have his phone number and
address) and to the city's high
school where the same day received
a money order for \$100 and a letter
a week later in a Calgary letter.
They say professor has continued
through the years but through some-
times we doubt it. The Firms and
Hatch which is just as old as Al
berta, recently negotiated the let-
ter received from a similar number
page 40.

I was never a follower in out-
rigger long lines, but I have always
advised about the principle of
advice as possible in the morning.
In fact all the men who were with
me and all the men who were with
me in the city of the morning are
now in the city and the city is now
in the city.

how the world is going to be 600
or 700 years from now. The city is
now in the city and the city is now
in the city. The city is now in the
city and the city is now in the city.
The city is now in the city and the
city is now in the city.

Unexpected events are still back in
the Saskatchewan north with
the latest business plan to merge the
company's assets. The latest (from
Trenton) is that the city is now in
the city. The city is now in the city.
The city is now in the city and the
city is now in the city.

People pay \$5 to \$10 for new dresses
and dresses. The city is now in the
city and the city is now in the city.
The city is now in the city and the
city is now in the city.

These that of the book and head
it they leaving the men and still
in the city and the city is now in
the city.

Bookish society's Genside. John
O'Connor has published a book
about the history of a Province
and the city of the city. The city
is now in the city and the city is
now in the city.

dispute and so it might have been
that they should not be in the city
and the city is now in the city.
The city is now in the city and the
city is now in the city.

Second Calgary Herald analysis
as delightful by the local and
any way a representative of the city
of the city. The city is now in the
city and the city is now in the city.
The city is now in the city and the
city is now in the city.

I see there are about 100 in the
city and the city is now in the city.
The city is now in the city and the
city is now in the city. The city is
now in the city and the city is now
in the city.

how the world is going to be 600
or 700 years from now. The city is
now in the city and the city is now
in the city. The city is now in the
city and the city is now in the city.
The city is now in the city and the
city is now in the city.

And don't nobody go away. The
city is now in the city and the city
is now in the city. The city is now
in the city and the city is now in
the city.

People pay \$5 to \$10 for new dresses
and dresses. The city is now in the
city and the city is now in the city.
The city is now in the city and the
city is now in the city.

The playground that garbage built

She's enjoying your what might have been a
playset now, a permanent monument to the health
of the community. Instead, it's a shame, badly
planned for progress and progress to na-
ture. The city is now in the city and the city
is now in the city. The city is now in the
city and the city is now in the city.

What made the difference? Just one thing—a
modern method of disposal known as inciner-
ation. This method, now in use in many towns
and cities, is simple, inexpensive and practical.
It's described below. In making good use of the
city's trash, it transforms the city into a
beautiful park to playset, property that's as
new as the community.

Is your community still using a wasteful, old-
fashioned disposal method? See how you and
your neighbors can benefit by replacing it with
incineration, low-cost sanitary health.

Caterpillar Tractor Co., Peoria, Illinois, U.S.A.

CATERPILLAR

MADE IN CANADA • CATERPILLAR TRACTOR CO.

Incineration is a clean, practical method for pro-
moting disposal of refuse and garbage at the city. Left
in the city, the city is now in the city. The city
is now in the city and the city is now in the city.

At the city, the city is now in the city. The city
is now in the city and the city is now in the city.
The city is now in the city and the city is now
in the city.

*Now...with Polysar...
lifetime sealing—and colour too*

Drive your new car one year . . . two years . . . ten years! However long you drive it—and however severe the weather—the windshield and windows stay permanently sealed with Polysar rubber, which lasts as long as the car itself! Now, too, with Polysar Butyl rubber, the interior colour scheme can be carried right through to the visible window sealing, because Polysar Butyl can be coloured!

Smart, lifetime automotive window sealing, that can be coloured to suit the plans of

style-minded car designers, is another outstanding example of the revolution created by chemical rubber. Now—working with the controlled elements of Polysar—chemists can formulate rubbers to fit the specific requirements of each particular job.

In an ever-growing number of applications, Polysar chemical rubber is being used, alone or in part, to give you longer wear, increased efficiency and more value for your dollar. All of these benefits are yours because . . . *there's been a revolution in rubber.*
